Mobile crushing plant

Portable type series mobile crusher is developed according to new series stone crushing equipment's design idea, which expands the concept field of coarse crushing and final crushing. Its design idea is based on the client's requirement, which clears faults of the crushing place, surroundings and the complex basic configurations. This series mobile crusher really supply simpler, higher efficient lower cost for clients.

Excellent performance:

Our company support Jaw Crusher, Impact Crusher, Cone Crusher

Vehicle electric generating set, motors and control box are all included.

Vehicle installation supporting, is easier for equipment to station in the working place

Turn axle of traction is convenient for road transit and expanding the working place.

Feeder, belt conveyor and vibrating screen are all in one.

Application:

Intergration entire unit

Intergration of the equipment form, removing separate component from the complex place base installation, lowering the material

Mobile crushing plant

the material and expenditure of time. With reasonable and compact spatial arrangement, the unit will increase the flexibility of the site deployments.

Flexibility

The mobile crushing plant has high chassis, small turning radius, the body is less wide than trailer, convenient highway driving, even on the crushing place or other poor road conditions. Saving time for arrive the work site. Provides a flexible space and reasonable layout configuration for whole crushing process.

Reduce material transport costs

The mobile crushing plant can supply on the first line of on-site crushing to avoid leave the material from the on-site, and greatly reduces material transport costs. What's more, the longer unit body can send crushed material directly into the transfer vehicle then leave on-site.

The role of direct and effective operation

Direct effective operation, Mobile crushing plant can be used independently, it can be customized on requirements of material type, and products. Satisfy the user mobile crushing, mobile screening and other requirements. More directly and effectively on production and transport, maximum reduce the cost.

Mobile crushing plant

Adaptable and flexible configuration

For primary crushing and final crushing system, the mobile crushing plant can be separate single to operation and also be joint operation flexible. The side hopper provides flexible configuration for transport material. Diesel generator set in Intergration entire unit not only provide for itself but also pointed for joint power unit system.

Reliable and easy maintenance

Mobile crushing plant with C series Jaw crusher has high efficiency, multifunction, high quality of crushed product, compact and reasonable structure design, excellent crushing performance. Providing our customers with reliable quality products and established a good reputation.
